

Using the points chart: The blue column is the rulebook points and included for refence. Wardroom created SHIPS have a WLPA cost in a differing colour, see VMF or RNN files for stats. These ships may not be allowed in tournaments, check with the TO.

When building a list with SHIPS if using a ship's Wardroom Errata use that column for that ship, otherwise use column marked SHIPS

Carrier flights have to be purchased even if taken on a carrier, flights costs are found at the end of this document

Where flights have a cost listed eg 8/4, the first is for land based flights and the lower is flights taken on a carrier.

Carriers have an addition cost listed in brackets, eg +(25), this is the minimum cost of all flights taken on that carrier - pay this unless the cost of the flights taken with that carrier is more.

Example: **HMS Eagle is listed as 105 +(25)** so you pay 105 point for the ship. If you take 5 **skua II dive bombers** with a carrier cost of **4 points each** that is only 20 point so you pay the **+(25) for a total of 130 points**. If you was to take **5 swordfish torpedo bombers at 6 points each** you would pay the **30 points** insted for a **total of 135**. If you dont take any flights you still pay the bracketed cost.

Building an ABDA force. You can build the battle of Java Sea (see rulebook) force, or use the Expanded list in two ways. First is the historical numbers and Ships (listed here), the other is choose from the classes and any refit as per normal for your VaS game and year

Note where Royal Navy or United States Navy etc appears in the Ship name column this is where the stats for that ship are found where different to the rest of the stats of the fleet. For flights & MTBS the name is colour coded the same as those titles instead.

Captured Ships [found in the rulebook] & Additional Ships found in the Wardroom Errata Document.

All Nations: When using SHIPS upto 25% (rounding down) of a carriers flights may be replaced with Aircraft 4 per flight at a cost of 20 points per flight
The cost of the Aircraft X trait counts towards the base cost of the carrier for list building and victory points. The minimun flight cost (shown brackets in the points list) is lowered by 5 points per flight capactiy reduced in the is way
eg a Royal Navy Illustrious carrier with flights 8 can replace 2 flights with aircraft 8 for +40points & then has Flight Capactiy 6. So now has a cost of 210 +(30) instead of 170 +(40)
